The Boy from World's End Jul 04 2020 *The Boy from World's End* is a detailed and honest account of the life and experiences of David Smith. The book traces David's early education in England,

focusing on his experiences of wartime evacuation and life in a remote rural setting at a place known as World's End Farm. When an exciting overseas journey takes David to begin a new life in Canada, he experiences the difficulties related to being an immigrant, but finds inspiration and encouragement that transforms his life into one dedicated to learning and growth. In these pages, David paints a vivid picture of his past, sharing stories from his family life, as well as the course of his higher education, which led him into his career as a university professor: a role in which he flourished as teacher, author, and administrator. Scattered throughout are stories of the interests, hobbies, and pastimes that enriched his life. While David aspires to share his life story with family, friends and colleagues, his narrative imparts valuable insights for all who read his story. He encourages readers to "know themselves", that is, to be explicitly aware of the values that guide them through life and to weigh them in its ever-changing circumstances. And he always brings his story back down to earth, reminding us to adopt creative pursuits that connect us with nature and that help us to work through life's inevitable quandaries and opportunities.

Point-of-Care Tests for Severe Hemorrhage Jun 02 2020 This book is a rich source of information on point-of-care (POC) tests for the diagnosis and treatment of severe hemorrhage, including thromboelastography, thromboelastometry, heparin monitoring systems, and platelet function analyzers (Multiplate, PFA-100, VerifyNow, etc.). The opening chapters focus on the pathophysiology of coagulation and the general characteristics of POC devices. The relevance of POC tests in specific

scenarios is then carefully explained, with guidance on their use in contexts including trauma, cardiovascular surgery, ECMO, liver surgery, postpartum hemorrhage, and disorders of hemostasis in the critically ill. An individual chapter is devoted to practical issues when applying POC tests, and the book closes by presenting a set of informative clinical cases. As POC devices gain increasing popularity as bedside diagnostic tools in different clinical settings, it is important for practitioners to understand their role and value. Point-of-Care Tests for Severe Hemorrhage will be a useful and reliable source of information for anesthesiologists, intensivists, cardiologists, and hematologists.
