[After the Cold War, Domestic Factors and U.S.-China Relations](#) Apr 30 2020 As relations between the United States and China move into a period of intense activity and sensitivity, this timely book addresses the impact of domestic factors in both countries on their post-Cold War/post-Tiananmen relations. The contributors examine the issue from a number of distinct perspectives: the increased impact of domestic factors in both countries due to changing strategic circumstances; the politics of China policy in the United States, with emphasis on the role of interest groups vis-a-vis Congress, the media, and other domestic institutions; the importance of domestic factors in U.S.-China economic conflicts; the combined impact of domestic factors in both China and the United States on the most important conflict of interest in U.S.-China relations -- the Taiwan issue.

[50 Years of Central Banking in Kenya](#) Jun 13 2021 "This book documents important milestones in the epic journey traversed by the Central Bank of Kenya over the last 50 years, putting into perspective the evolution of central banking globally and within the East African region, and contemplating future prospects and challenges. The book is timely, mainly because the global financial landscape has shifted. Central bankers have expanded their mandates, beyond the singular focus on inflation and consider economic growth as their other important objective. Financial crises have continued to disrupt the functioning of financial institutions and markets, the most devastating episodes being the global financial crisis, which broke out in 2008 and from which the global financial system has not fully recovered, and the unprecedented challenges posed by the global coronavirus pandemic. Bank regulation has moved from Basel I, to Basel II, and somehow migrated to Basel III, although some countries are still at the cross-roads. The book originated from the wide ranging discussions on central banking, from a symposium to celebrate the 50 year anniversary on 13 September 2016 in Nairobi. The participants at the symposium included current and former central bank governors from Kenya and the Eastern Africa region, high level officials from multilateral financial institutions, policy makers, bank executives, civil society actors, researchers and students. The book is an invaluable resource for policy makers, practitioners and researchers, on how monetary policy and financial practices in vogue today in Kenya have evolved through time and worked very well, but also about some pitfalls"--
