Smart Computing Paradigms: New Progresses and Challenges Jul 24 2019 This two-volume book focuses on both theory and applications in the broad areas of communication technology, computer science and information security. It brings together contributions from scientists, professors, scholars and students, and presents essential information on computing, networking, and informatics. It also discusses the practical challenges encountered and the solutions used to overcome them, the goal being to promote the "translation" of basic research into applied research, and of applied research into practice. The works presented here will also demonstrate the importance of basic scientific research in a range of fields.

Examples & Explanations for Criminal Procedure II Jun 02 2020 A favorite classroom prep tool of successful students that is often recommended by professors, the Examples & Explanations (E&E) series provides an alternative perspective to help you understand your casebook and in-class lectures. Each E&E offers hypothetical questions complemented by detailed explanations that allow you to test your knowledge of the topics in your courses and compare your own analysis. Here's why you need an E&E to help you study throughout the semester: Clear explanations of each class topic, in a conversational, funny style. Features hypotheticals similar to those presented in class, with corresponding analysis so you can use them during the semester to test your understanding, and again at exam time to help you review. It offers coverage that works with ALL the major casebooks, and suits any class on a given topic. The Examples & Explanations series has been ranked the most popular study aid among law students because it is equally as helpful from the first day of class through the final exam.

[Little Did I Know](#) Jul 16 2021 An autobiography in the form of a philosophical diary, *Little Did I Know's* underlying motive is to describe the events of a life that produced the kind of writing associated with Stanley Cavell's name. Cavell recounts his journey from early childhood in Atlanta, Georgia, through musical studies at UC Berkeley and Julliard, his subsequent veering off into philosophy at UCLA, his Ph.D. studies at Harvard, and his half century of teaching. Influential people from various fields figure prominently or in passing over the course of this memoir. J.L. Austin, Ernest Bloch, Roger Sessions, Thomas Kuhn, Robert Lowell, Rogers Albritton, Seymour Shifrin, John Rawls, Bernard Williams, W. V. O. Quine, and Jacques Derrida are no longer with us; but Cavell also pays homage to the living: Michael Fried, John Harbison, Rose Mary Harbison, Kurt Fischer, Milton Babbitt, Thompson Clarke, John Hollander, Hilary Putnam, Sandra Laugier, Belle Randall, and Terrence Malick. The drift of his narrative also registers the decisiveness of the relatively unknown and the purely accidental. Cavell's life has produced a trail of some eighteen published books that range from treatments of individual writers like

Wittgenstein, Austin, Emerson, Thoreau, Heidegger, Shakespeare, and Beckett to studies in aesthetics, epistemology, moral and political philosophy, cinema, opera, and religion.

Implementing Document Imaging and Capture Solutions with IBM Datacap Nov 19 2021 Organizations face many challenges in managing ever-increasing documents that they need to conduct their businesses. IBM® content management and imaging solutions can capture, store, manage, integrate, and deliver various forms of content throughout an enterprise. These tools can help reduce costs associated with content management and help organizations deliver improved customer service. The advanced document capture capabilities are provided through IBM Datacap software. This IBM Redbooks® publication focuses on Datacap components, system architecture, functions, and capabilities. It explains how Datacap works, how to design a document image capture solution, and how to implement the solution using Datacap Developer Tools, such as Datacap FastDoc (Admin). FastDoc is the development tool that designers use to create rules and rule sets, configure a document hierarchy and task profiles, and set up a verification panel for image verification. A loan application example explains the advanced technologies of IBM Datacap Version 9. This scenario shows how to develop a versatile capture solution that is able to handle both structured and unstructured documents. Information about high availability, scalability, performance, backup and recovery options, preferable practices, and suggestions for designing and implementing an imaging solution is also included. This book is intended for IT architects and professionals who are responsible for creating, improving, designing, and implementing document imaging solutions for their organizations.

The book is divided into two parts. Part I deals with image processing. A comprehensive survey of different methods of image processing, computer vision is also presented. Part II deals with the telecommunications networks and computer networks. Applications in these areas are considered. In conclusion, the edited book comprises papers on diverse aspects of image processing and communications systems. There are theoretical aspects as well as application papers.

The Promise of New Technologies in an Age of New Health Challenges Apr 24 2022 There is a changed emphasis in many health services, with conventional pressures such as budget and workforce constraints, combined with the indirect forces of social change and strategic direction, bringing about the need for more flexible approaches for the longer term. By enabling different care models and delivery channels, telehealth offers demonstrably effective and sustainable solutions for issues such as access to and quality of care. This book presents 18 papers delivered at the 5th Global Telehealth Conference, held in Auckland, New Zealand, in November 2016. The theme chosen for Global Telehealth 2016 is 'The Promise of New Technologies in an Age of New Health Challenges', and the papers included here cover a wide variety of topics, from theoretical and abstract contributions through to discussions of practical projects and highly specific applied contributions. The book also includes two invited papers which detail recent contributions to two global issues in which telehealth plays a major role: universal health coverage and personal health monitoring. With papers ranging in scope from computer assisted screening technology for diabetic retinopathy to behavior change through computer games, this book will be of interest to all those involved in the design and provision of healthcare services.

How To Become A Marketing Superstar May 26 2022 The idea of marketing is simple. The doing of marketing is hard. It is the marketer's job to generate revenue, to ring the cash register. Recent studies show that at least 90% of ads are not read or are unintelligible. Money is squandered because of weak messages, cluttered images and poor creative strategy. In addition, selling is one of the least efficient and effective parts of the marketing mix - 95% of all salespeople never ask for the order. If you want to find out how to get and keep customers and make that cash register ring, *How to Become a Marketing Superstar* is the book for you.

Marrying Up Jan 22 2022 She stopped at nothing. To get everything. Scheming social climber Alexa may be humbly born. But she's a class-hopping cruise missile aimed at the very top of the gold-digging tree. Only a title, mansion and family tiara will do. Befriending feckless aristo Florrie (three surnames plus black hole where her brain should be) means the grandest doors swing open and the prince of her dreams is in sight. But has Florrie's mother, the formidable Lady Annabel, rumbled what Alexa is up to? Beautiful but penniless student Polly, meanwhile, is in love. Is Max, the handsome young vet she's found in a country lane, quite as ordinary as he seems, however? Passionate love, eye-widening snobbery and more than naked ambition abound in this contemporary Cinderella tale - a deliciously satirical novel of the upwardly mobile.
