**Optimizing Higher Education Learning Through Activities and Assessments Mar 07 2021 The mission of higher education in the 21st century must focus on optimizing learning for all students. In a shift from prioritizing effective teaching to active learning, it is understood that computer-enhanced environments provide a variety of ways to reach a wide range of learners who have differing backgrounds, ages, learning needs, and expectations. Integrating technology into teaching assumes greater importance to improve the learning experience. Optimizing Higher Education Learning Through Activities and Assessments is a collection of innovative research that explores the link between effective course design and student engagement and optimizes learning and assessments in technology-enhanced environments and among diverse student populations. Its focus is on providing an understanding of the essential link between practices for effective "activities" and strategies for effective "assessments," as well as providing examples of course designs aligned with assessments, positioning college educators both as leaders and followers in the cycle of lifelong learning. While highlighting a broad range of topics including collaborative teaching, active learning, and flipped classroom methods, this book is ideally designed for educators, curriculum developers, instructional designers, administrators, researchers, academicians, and students.**

**How the Brain Learns Jun 29 2020 Deliver game-changing—and brain-changing—results for your students Research on the brain continues to evolve, providing fresh insights educators can use to guide students toward success. In the**

sixth edition of this international bestseller, world-renowned educational neuroscience consultant David Sousa once again translates that research into concrete actions and strategies for the classroom. Featuring important updates and brand-new findings, the latest edition includes: A new section on the expansion of SEL to SECL, integrating the cognitive component of social-emotional learning Additional research on mindsets—including cautions Effective, brain-compatible ways to safely use social media and online learning New information on the importance of student engagement, especially through academic teams Connections between Bloom's Taxonomy and current instructional strategies, such as teaming and project/maker learning Whether you're already a fan of brain-compatible learning or just getting started on this exciting approach to teaching and learning, *How the Brain Learns* will set your neurons firing—and give you the tools you need to help students succeed.

*The American Journey* Dec 24 2019

*Reform in Undergraduate Science Teaching for the 21st Century* Oct 22 2019 The mission of the book series, *Research in Science Education*, is to provide a comprehensive view of current and emerging knowledge, research strategies, and policy in specific professional fields of science education. This series would present currently unavailable, or difficult to gather, materials from a variety of viewpoints and sources in a usable and organized format. Each volume in the series would present a juried, scholarly, and accessible review of research, theory, and/or policy in a specific field of science education, K-16. Topics covered in each volume would be determined by present issues and trends, as well as generative themes related to current research and theory. Published volumes will include empirical studies, policy analysis, literature reviews, and positing of theoretical and conceptual bases.

*You're Teaching My Child What? Jan 25 2020 Think Sex Ed Is All About The "Facts of Life"? Think Again. If you think sex education is still about the birds and the bees, think again. And it's not about science either. In her shocking exposé, *You're Teaching My Child What?*, Dr. Miriam Grossman rips back the curtain on sex education today, exposing a sordid truth. Today's sex ed programs aren't based on science; they're based on liberal lies and politically correct propaganda that promote the illusion that children (yes, children) can be sexually free without risk. As a psychiatrist and expert on sexual education, Dr. Grossman cites example after example of schools and organizations whitewashing—or omitting altogether—crucial information that doesn't fit in with their "PC" agenda. Instead, sex educators only tell teens the "facts of life" that promote acceptance, sexual exploration, and experimentation. What sex educators call an education, scientists would call a scam: • Sex educators won't tell girls their bodies are biologically and chemically more susceptible to STDs; they will only say 3 million girls have a sexually transmitted infection • Educators say it's natural for children to "explore" their sexuality from a young age and only they can decide when it's right to have sex—the real truth is neurobiologists say teen brains are not developed to fully reason and weigh consequences, especially in "the heat of the moment" • Teens are told condoms, vaccines and yearly testing provide adequate protection, without being told that studies now show condoms are no match for herpes,*

**HPV and gonorrhea In You're Teaching My Child What?, Dr. Grossman reveals biological truths that you won't find in today's classrooms. You're Teaching My Child What? is critical reading for parents with teens and instrumental in teaching children the truth about sex.**
