A Comprehensive Guide to Child Psychotherapy and Counseling Jun 01 2020
Christiane Brems, an experienced clinician, supervisor, and educator, presents a metatheoretical yet practical guide to working with children ages 3 to 12 years. She draws heavily on developmental, interpersonal, family systems, and self-psychological schools of thought and integrates the core components of all of these approaches in a clear and concise manner. She stresses the need for intensive assessment to precede conceptualization and treatment planning so that treatment techniques are dictated by the needs of each child and family. Brems has contoured the third edition to meet the practical needs and expectations of students and practitioners. Divided among four sections, the chapters follow the logical

development of clinicians, mirroring the natural flow of work with children from the practitioners self-exploration, to learning about special aspects of children (such as diversity and development), to awareness about the special needs and demands of children as related to environmental, legal, and ethical issues. Brems prepares clinicians to discover their own personal traits that may facilitate or hinder their work with children. She walks child therapists and counselors through the initial stages of intake, assessment, and conceptualization. The material on assessment instruments is thoroughly updated; discussions refer to the latest versions of instruments, and if new instruments emerged that meet one of the purposes deemed essential to child treatment, they are included. The text contains case examples, each illustrating a specific therapeutic technique.

The Smart Parent's Guide Jul 14 2021 What to Do When You Don't Know What to Do! "Moms and dads need expert guidelines, especially when it comes to their kids' health. This book reveals the inside strategies I use myself—I'm a parent, too!—to avoid critical, common blunders where it matters most: in the ER, pediatrics ward, all-night pharmacy, exam room, or any other medical hot spot for kids. These tips could save your child's life one day. Even tomorrow." —Dr. Jen Making health care decisions for your child can be overwhelming in this age of instant information. It's easy to feel like you know next to nothing or way too much. Either way, you may resort to guessing instead of making smart choices. That's why the nation's leading health care oversight group, The Joint Commission, joined forces with Dr. Jennifer Trachtenberg on this book: to help you make the right decisions, whether you're dealing with a checkup or a full-blown crisis. *The Smart Parent's Guide* will give you the information you need to manage the pediatric health care system. Dr. Jen understands the questions parents face—as a mom, she's faced them herself. She walks you through everything: from how to choose the best ER for kids (not adults) to when to give a kid medicine (or not to) to how pediatricians care for their own children (prepare to be surprised). Her goal is your goal: to protect the health of your children. There simply is nothing more important.
