**New York Magazine** Jul 19 2019 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

**New York Magazine** Feb 24 2020 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Introduction to Numerical and Analytical Methods with MATLAB® for Engineers and Scientists Feb 06 2021 Introduction to Numerical and Analytical Methods with MATLAB® for Engineers and Scientists provides the basic concepts of programming in MATLAB for engineering applications. • Teaches engineering students how to write computer programs on the MATLAB platform • Examines the selection and use of numerical and analytical methods through examples and case studies • Demonstrates mathematical concepts that can be used to help solve engineering problems, including matrices, roots of equations, integration, ordinary differential equations, curve fitting, algebraic linear equations, and more The text covers useful numerical methods, including interpolation, Simpson's rule on integration, the Gauss elimination method for solving systems of linear algebraic equations, the Runge-Kutta method for solving ordinary differential equations, and the search method in combination with the bisection method for obtaining the roots of transcendental and polynomial equations. It also highlights MATLAB's built-in functions. These

include interp1 function, the quad and dblquad functions, the inv function, the ode45 function, the fzero function, and many others. The second half of the text covers more advanced topics, including the iteration method for solving pipe flow problems, the Hardy-Cross method for solving flow rates in a pipe network, separation of variables for solving partial differential equations, and the use of Laplace transforms to solve both ordinary and partial differential equations. This book serves as a textbook for a first course in numerical methods using MATLAB to solve problems in mechanical, civil, aeronautical, and electrical engineering. It can also be used as a textbook or as a reference book in higher level courses.

**Top Notch Executive Resumes** Nov 22 2019 Branded resumes that illuminate the candidate's unique value proposition and ROI are a must in today's quest for the executive suite. Top Notch Executive Resumes not only explains how to integrate branding into career-marketing communication, but also how to craft resumes that address your fit with the organization's mission and meet an employer's specific business needs. Hansen instructs high-level professionals in framing past accomplishments so that the employer can visualize the executive's strategic vision and industry insights, as well as what he or she can contribute. Highlights of the book include: A huge collection of resume samples in cutting-edge formats, organized by profession for easy navigability. Examples of a wide variety of complementary documents—including leadership profiles and executive bios—that top-level professionals need to round out their executive portfolios. Special additional features, including the preferences and peeves of hiring decision-makers, guidelines for working with recruiters, frequently asked questions, and case studies detailing complete job-search marketing campaigns. Let Top Notch Executive Resumes get you into that corner office!

*North Carolina Unfair Business Practice 3rd Edition* Sep 13 2021 North Carolina Unfair Business Practice, 3rd Edition, is the only publication providing comprehensive guidance on the complex world of consumer protection, and unfair and deceptive trade practices in North Carolina. Focusing heavily on North Carolina General Statute 75-1.1, this publication's importance and prominence has grown steadily through the years, as the area of unfair business practices continues to expand. An essential resource for any attorney advising businesses on appropriate trade practices or representing clients potentially harmed by unfair business practice, North Carolina Unfair Business Practice, 3rd Edition, provides expert analysis of the statute through detailed examination of hundreds of cases interpreting its provisions. Highlights include: • Comprehensive analysis of General Statute 75-1. • Examination of potential liability stemming from consumer fraud or deception in areas such as landlord/tenant relations, insurance, advertising, the purchase of real property and the purchase of consumer products • Remedies for violations of General Statute 75-1.1 • Discussion of a common law

claim for unfair competition • Examination of federal antitrust statutes • Sample forms

**Georgia Workers' Compensation Laws, Rules and Regulations Annotated 2021 Edition** Jul 23 2022 Georgia Worker's Compensation Laws, Rules and Regulations Annotated contains the verbatim text of Title 34, Chapter 9 (Worker's Compensation) of the Official Code of Georgia Annotated. Authoritative case notes and annotations prepared by our staff of lawyer-editors accompany the statutes and rules. This edition is published in cooperation with the Atlanta Claims Association and the State Board of Worker's Compensation and carries the Rules and Regulations of the State Board of Worker's Compensation and the Rules of Subsequent Injury Trust Fund in their entirety.

*Discovering and Developing Molecules with Optimal Drug-Like Properties* Jul 31 2020 This authoritative volume provides a contemporary view on the latest research in molecules with optimal drug-like properties. It is a valuable source to access current best practices as well as new research techniques and strategies. Written by leading scientists in their fields, the text consists of fourteen chapters with an underlying theme of early collaborative opportunities between pharmaceutical and discovery sciences. The book explores the practical realities of performing physical pharmaceutical and biopharmaceutical research in the context of drug discovery with short timelines and low compound availability. Chapters cover strategies and tactics to enable discovery as well as predictive approaches to establish, understand and communicate risks in early development. It also examines the detection, characterization, and assessment of risks on the solid state properties of advanced discovery and early development candidates, highlighting the link between solid state properties and critical development parameters such as solubility and stability. Final chapters center on techniques to improve molecular solubilization and prevent precipitation, with particularly emphasis on linking physiochemical properties of molecules to formulation selection in preclinical and clinical settings.

**Numerical Approximation Methods** Mar 07 2021 This book presents numerical and other approximation techniques for solving various types of mathematical problems that cannot be solved analytically. In addition to well known methods, it contains some non-standard approximation techniques that are now formally collected as well as original methods developed by the author that do not appear in the literature. This book contains an extensive treatment of approximate solutions to various types of integral equations, a topic that is not often discussed in detail. There are detailed analyses of ordinary and partial differential equations and descriptions of methods for estimating the values of integrals that are presented in a level of detail that will suggest techniques that will be useful for developing methods for approximating solutions to problems outside of this text. The book is intended for researchers who must approximate solutions to problems that cannot be solved analytically. It is also appropriate for students taking courses in numerical approximation techniques.

**Relentless Solution Focus: Train Your Mind to Conquer Stress, Pressure, and Underperformance** Jun 17 2019 From bestselling author and mental toughness expert Jason Selk comes a mind-training regimen for reframing every problem into an opportunity for productive action. The most common cause of failing to reach our professional and personal goals is hardwired in us: Humans instinctively focus on problems. Over millennia, our very survival relied on our ability to be alert to any potential dangers that could threaten our existence. But today this negativity bias significantly limits our potential and increases stress, pressure, and underperformance. The one characteristic all phenomenally successful people share is mental toughness. Mentally tough people are better at making decisions more quickly and with better results. They possess the uncanny ability to control what goes on between their ears. Instead of allowing their minds to focus on their problems when adversity strikes, the most successful people have learned to direct their thoughts in a systematic manner that produces positive emotions and productive actions: they have a Relentless Solution Focus. In this book, top performance coach Dr. Jason Selk—former Director of Mental Training for the World Series champions St. Louis Cardinals—and his colleague Dr. Ellen Reed provide the insight, tools, and proven step-by-step framework for you to do the same. When you have Relentless Solution Focus, you think better. Your decisions garner positive results. You take action and follow through—every time. And when you do get off track, you get back on with less effort and less drama. Weakness shrinks and strength grows, creating confidence and momentum, taking you and your team to higher levels of performance and achievement.
