It is a colourful tale of adventure, discovery and survival in the remotest areas of New Zealand's Southern

Alps. William James O'Leary was a man of humble origins. His lifetime (1865-1947) spanned a period of New Zealand history when the country was searching for homegrown heroes in whose lives the young nation could discover clues to the question of its identity. The decades O'Leary spent in the unforgiving mountain country of North-West Otago and South Westland, prospecting for gold and other minerals and making new tracks in unexplored areas, was bound to be regarded with envy and admiration by townfolk. The myth-making process was assisted when the nickname 'Arawata Bill' stuck, but it is

the man's astonishing feats of endurance, tenacity and charming eccentricity which capture the imagination. Add in the mystery of a lost ruby mine, a seaboot full of gold sovereigns and the aura of secrecy surrounding the quest for precious metal, and you have the stuff of which legends are made. Generations of New Zealand schoolchildren are familiar with Denis Glover's poem Arawata Bill, yet the subject of that work was only loosely based on William O'Leary. The man himself, in his solitary and self-effacing way, was both smaller and greater than the legend. He emerged as one of those archetypal New Zealanders

who helped to define a distinctive nationality. In this biography, Ian Dougherty has separated the man from the myth, with a warmly human portrait of an ordinary man who lived an extraordinary life.

Problem Determination for Linux on System z Mar 29 2020 This IBM Redbooks publication addresses some of the common problems that customers have experienced on the Linux® on System z™ platform. This book provides a problem determination methodology and tools to help the reader diagnose the problem in an easy-to-read self-help manual. We start with a discussion on how to approach problem solving in the Linux on

System z environment and continue on to describe some of the problem determination tools commonly used for z/VM and Linux on system z. We continue with discussions on network problem determination, performance problem determination, and storage problems. Additionally, we discuss the formation of eligible (or eligibility) lists.

Enterprise JavaBeans 3.0

Sep 03 2020 If you're up on the latest Java technologies, then you know that Enterprise JavaBeans (EJB) 3.0 is the hottest news in Java this year. In fact, EJB 3.0 is being hailed as the new standard of server-side business logic programming. And O'Reilly's award-winning book on EJB has been refreshed just in time to capitalize on the technology's latest rise in popularity. This fifth edition, written by Bill Burke and Richard Monson-Haefel, has been updated to capture the very latest need-to-know Java technologies in the same award-winning fashion

that drove the success of the previous four strong-selling editions. Bill Burke, Chief Architect at JBoss, Inc., represents the company on the EJB 3.0 and Java EE 5 specification committees.

Richard Monson-Haefel is one of the world's leading experts on Enterprise Java. Enterprise JavaBeans 3.0, 5th Edition is organized into two parts: the technical manuscript followed by the JBoss workbook. The technical manuscript explains what EJB is, how it works, and when to use it. The JBoss workbook provides step-by-step instructions for installing, configuring, and running the examples from the manuscript on the JBoss 4.0 Application

Server. Although EJB makes application development much simpler, it's still a complex and ambitious technology that requires a great deal of time to study and master. But now, thanks to Enterprise JavaBeans 3.0, 5th Edition, you can overcome the complexities of EJBs and learn from hundreds of practical examples that are large enough to test key concepts but small enough to be taken apart and explained in the detail that you need. Now you can harness the complexity of EJB with just a single resource by your side.

of the new IBM Spectrum™ Archive V1.2.6 for the IBM TS3310, IBM TS3500, IBM TS4300, and IBM TS4500 tape libraries. IBM Spectrum Archive™ EE enables the use of the LTFs for the policy management of tape as a storage tier in an IBM Spectrum Scale™ based environment. It helps encourage the use of tape as a critical tier in the storage environment. This is the sixth edition of IBM Spectrum Archive Installation and Configuration Guide. IBM Spectrum Archive EE can run any application that is designed for disk files on a physical tape media. IBM Spectrum Archive EE supports the IBM Linear

Tape-Open (LTO) Ultrium 8, 7, 6, and 5 tape drives in IBM TS3310, TS3500, TS4300, and TS4500 tape libraries. In addition, IBM TS1155, TS1150, and TS1140 tape drives are supported in TS3500 and TS4500 tape library configurations. IBM Spectrum Archive EE can play a major role in reducing the cost of storage for data that does not need the access performance of primary disk. The use of IBM Spectrum Archive EE to replace disks with physical tape in tier 2 and tier 3 storage can improve data access over other storage solutions because it improves efficiency and streamlines management for files on tape. IBM Spectrum

Archive EE simplifies the use of tape by making it transparent to the user and manageable by the administrator under a single infrastructure. This publication is intended for anyone who wants to understand more about IBM Spectrum Archive EE planning and implementation. This book is suitable for IBM clients, IBM Business Partners, IBM specialist sales representatives, and technical specialists. *Solaris 9 System Administrator* Mar 09 2021 The perfect study companion for UNIX system professionals preparing for both Solaris 9 System Administrator exams (CX-310-014 and CX-310-015)!
