The Home Front Pocket Manual, 1939–1945 Sep 17 2021 This compilation of WWII-era magazine articles is "a really useful reference guide covering aspects of life in the 1940s . . . packed with information" (Home Front History). This manual brings together articles from stylish contemporary magazines of Britain during the World War II era, including Britannia & Eve, the Illustrated Sporting and Dramatic News, and Tatler, on all aspects of life on the home front. Out of the Lab and On the Market Jan 22 2022 Tetsu Natsume of Sony Computer Science Labs (Sony CSL) has been pioneering technology promotion for a decade. As he seeks marketplace opportunities for ground-breaking research, he plays the role of a Technology Producer -- a role that will be increasingly important as organizations seek optimally efficient and effective applications of basic research. Natsume's task has been greatly facilitated by his association with Sony CSL, a research lab founded by co-author Mario Tokoro. While CSL is owned by SONY, it nevertheless operates almost entirely independently. At CSL, a diverse, cosmopolitan group of talented researchers are free to explore any idea that might one day change the world. Natsume's task is to optimise that process by identifying the best path to the market for the new insights that pour out of CSL. Functioning somewhat like a movie producer, Natsume has blazed a trail for technology promoters the world over. He explains his techniques for overcoming challenges and embracing opportunities. His "10 core principles of technology promotion", which offer the reader an especially valuable framework for moving between the very different worlds of the lab and the marketplace, cover the importance of appropriate timing, speed, commitment and mindset, while being rigorously simple

and boldly ambitious. This book is an eye-opening primer for anyone interested in realising and optimising the commercial value of basic research.

Rezeption und Tradierung als komplexes Netzwerk Jul 16 2021 Das vorliegende Buch behandelt Phänomene des Nachlebens antiker Monumente in visuellen Darstellungen. Rezeption bezeichnet dabei den Bezug zum gezeigten Gegenstand, Tradierung das Verhältnis der Darstellungen untereinander. Anhand der Analyse zweier Datenmengen - dem Census of Antique Works of Art and Architecture Known in the Renaissance und einer Sammlung von visuellen Dokumenten zu den Thermen in Rom - wird gezeigt, dass die Prozesse von Rezeption und Tradierung als komplexe Netzwerke im Sinne der diskreten Mathematik verstanden werden können. Methodisch schlägt die vorliegende Arbeit eine Brücke zwischen Kunstgeschichte, Archäologie und Netzwerkforschung. Dadurch wird eine nahtlose Verbindung von Einzeluntersuchung und Überblick, von qualitativer wie quantitativer Analyse erreicht. Einzelne Dokumente, wissenschaftliche Publikationen und ganze Datenbanken werden dabei gleichberechtigt quellenkritisch behandelt. Fundiert wird der vorgeschlagene Ansatz, jenseits der praktischen Anwendung, durch die Erläuterung relevanter Konzepte aus der Kognitionswissenschaft wie der Netzwerkforschung. Die inhaltlichen Ergebnisse sind sowohl für die Kunstgeschichte wie auch die Archäologie, insbesondere das Thema der Antikenrezeption sowie für die Thermenforschung von Bedeutung. Darüber hinaus dient der vorgestellte methodische Ansatz als Ausgangspunkt für weitere Forschungen zu komplexen Netzwerken in den Kunstwissenschaften.
