Collective Understanding, Radicalism, and Literary History.

1645-1742 Nov 25 2019 Political, literary, and cultural historians of the early modern Anglophone world have long characterized the crucial century between 1642 and 1742 as the period when absolutist theories of sovereignty yielded their dominance to shared models of governance and a burgeoning doctrine of unalienable, individual rights. Yet even the most cursory glance at the cultural record, reveals that individualism was largely a footnote to a conflict over the production of political and cultural authority that erupted around the middle of the seventeenth century between sovereignty and collectivity. *Collective Understanding, Radicalism, and Literary History* reaches back to the English civil wars (1642-46, 1648) when a distinctive and anti-authoritarian hermeneutic emerged from the dissident community known as the Levellers. used to advance their opposition to sovereignty's epistemological paradigm. Writers such as William Davenant, Aphra Behn, Edward Sexby, Algernon Sidney, and Daniel Defoe repeatedly exposed these dissident methods as a profound and potentially catastrophic challenge to the political privileges of the ancien régime as well as its ancestral monopoly on the production of new knowledge.
