Hybrid Learning and Education Sep 25 2019 The Second International Conference on Hybrid Learning was organized by the School of Continuing and Professional Studies of The Chinese University of Hong Kong and University of Macau in August 2009. ICHL 2009 was an inventive experience for the Hong Kong and Macau tertiary higher education. The conference aims to provide a good platform for knowledge exchange on hybrid learning by focusing on student centered education. The technique is to supplement traditional classroom learning with eLearning. The slogan is "Education leads eLearning," not vice versa. The me-odology is that at least 30% of learning activities are done by eLearning. The outcome is for students to learn at any time at any place. eLearning can increase students' lea- ing productivity and reduce teachers' administration workload alike. It is a new culture for students, teachers and school administrators to adopt in the twenty-first century. The conference obtained sponsorship from Pei Hua Education Foundation Limited, City University of Hong Kong, ACM Hong Kong Section, and Hong Kong Computer Society. Hybrid learning originated from North America in 2000, and is an ongoing trend. It is not merely a simple combination of direct teaching and eLearning. It encompasses different learning strategies and important elements for teaching and learning. It - phasizes outcome-based teaching and learning, and provides an environment for knowledge learning. Students are given more opportunities to be active learners and practice practical skills such as communication, collaboration, critical thinking, cr- tivity, self-management, self-study, problem solving, analysis and numeracy.

EBOOK: How to Improve your Assignment Results Mar 31 2020 Are you puzzled by tutor comments on your assignments? Do you want to improve your grades but aren't sure how? Do you want help but don't know where to go or who to ask? If so, then this book will save the day! It will help any student to understand the comments they receive on their assignments and improve their assignment results. The book focuses on the common weaknesses that lecturers highlight when they write comments such as: 'You have not answered the question' 'Your work is more descriptive than critical' 'You did not tell me anything new' 'Your English is weak; it was difficult to follow your arguments' And by understanding what tutors are looking for in essays, students can quickly learn how to improve their assignment structures, the language they use, and their referencing skills in order to raise their grades. There is also a vital section on how to be more creative in assignments as well as a chapter on where to go for more help. This is an essential companion for all students who are not sure how to address the assignment feedback raised by their lecturer. It is also key reading for those who give feedback to students.

Prioritization, Delegation, and Assignment - E-Book Jun 02 2020 Prepare for the Next-Generation NCLEX-RN® Exam (NGN) and gain the clinical judgment skills you need to manage patient care safely and effectively! Prioritization, Delegation, and Assignment: Practice Exercises for the NCLEX-RN® Examination, 5th Edition is the first and the most popular NCLEX-RN Exam review book focused exclusively on building management-of-care clinical judgment skills. What's more, this bestselling review is now enhanced for the NGN with new NGN-style questions! Beginning with concepts relating to prioritization, delegation, and assignment decisions, the workbook guides you through patient care scenarios and exercises progressing from simple to complex. All of the book's questions are provided in an interactive online format on the Evolve website in tests that simulate the latest NCLEX-RN Exam. Written by a team of noted educators led by Linda A. LaCharity, this review prepares you for success on the NGN and in clinical practice like no other! A Different Assignment Oct 31 2022 This book is the professional autobiography of a dedicated teacher. Time spent in traditional teaching methods, with the class system controlled by the timetable, caused him great dissatisfaction since it clearly did not maintain the interest and motivation of the pupils. Too much effort and time was spent on controlling the class, little time for helping children who were dropping behind in the rigid system and scarcely any involvement which could stimulate learning by the pupils. Various experiences pointed to a different method of organising a school, in which the pupils controlled their own programme and the teachers taught, and also had time to work with pupils who needed extra guidance. The result was a school where social education and discipline were intrinsic to the school work and pupils left with the knowledge and ability to work and live in the adult community.

From Ælfric to the New York Times May 14 2021 The twenty papers of this volume - published to honour Gunnel Tottie - are of interest to everyone concerned with the study of the English language. The collection is a convincing argument for an approach to language studies based on the analysis of computerized corpora. Though this is not an introduction to the field but a series of highly specialized studies, readers get a good overview of the work being done at present in English computer corpus studies. English corpus linguistics, though basically concerned with the study of varieties of English, goes far beyond the simple ordering and counting of large numbers of examples but is deeply concerned with linguistic theory - based on real language data. The volume includes sections on corpora of written and spoken present-day English, historical corpora, contrastive corpora, and on the application of corpus studies to teaching purposes.
