**Databases and Information Systems VI** May 10 2021 Selected Papers from the Ninth International. This volume presents papers from the Ninth International Baltic Conference on Databases and Information Systems Baltic DBIS 2010 which took place in Riga, Latvia in July 2010. Since this successful biennial series began in 1994, the Baltic DBIS confer

**Advances in Multiuser Detection** Jun 30 2020 A Timely Exploration of Multiuser Detection in Wireless Networks During the past decade, the design and development of current and emerging wireless systems have motivated many important advances in multiuser detection. This book fills an important need by providing a comprehensive overview of crucial recent developments that have occurred in this active research area. Each chapter is contributed by noted experts and is meant to serve as a self-contained treatment of the topic. Coverage includes: Linear and decision feedback methods Iterative multiuser detection and decoding Multiuser detection in the presence of channel impairments Performance analysis with random signatures and channels Joint

detection methods for MIMO channels Interference avoidance methods at the transmitter Transmitter precoding methods for the MIMO downlink This book is an ideal entry point for exploring ongoing research in multiuser detection and for learning about the field's existing unsolved problems and issues. It is a valuable resource for researchers, engineers, and graduate students who are involved in the area of digital communications.

*Knowledge Management and Acquisition for Intelligent Systems* Jun 18 2019 This book constitutes the proceedings of the 15th International Workshop on Knowledge Management and Acquisition for Intelligent Systems, PKAW 2018, held in Nanjing, China, in August 2018. The 15 full papers and 7 short papers included in this volume were carefully reviewed and selected from 51 initial submissions. They cover the methods and tools as well as the applications related to developing a knowledge base, healthcare, financial systems, and intelligent systems.

**Guide to FPGA Implementation of Arithmetic Functions** May 22 2022 This book is designed both for FPGA users interested in developing new, specific components - generally for reducing execution times –and IP core designers interested in extending their catalog of specific components. The main focus is circuit synthesis and the discussion shows, for example, how a given algorithm executing some complex function can be translated to a synthesizable circuit description, as well as which are the best choices the designer can make to reduce the circuit cost, latency, or power consumption. This is not a book on algorithms. It is a book that shows how to translate efficiently an algorithm to a circuit, using techniques such as parallelism, pipeline, loop unrolling, and others. Numerous examples of FPGA implementation are described throughout this book and the circuits are modeled in

VHDL. Complete and synthesizable source files are available for download.

**Research and Professional Practice in Specialised Translation** Apr 28 2020 Specialised translation has received very little attention from academic researchers, but in fact accounts for the bulk of professional translation on a global scale and is taught in a growing number of university-level translation programmes. This book aims to provide three things. Firstly, it offers a description of what makes the approach to specialised translation distinctive from wider-ranging approaches to Translation Studies adopted by translation scholars and applied linguists. Secondly, unlike the traditional approach to specialised translation, this book explores a perspective on specialised translation that is much less focused on terminology and more on the function and reception of specialised (translated) texts. Finally, the author outlines a professionally-oriented hands-on approach to the teaching of specialised translation resulting from many years of teaching it to MA students. The book will be of interest to Translation Studies students and scholars, as well as professional translators who are interested in the theory on which their activity is based.

**Intercultural Communication and Language Pedagogy** Aug 13 2021 Using diverse language examples and tasks, this book illustrates how intercultural communication theory can inform second language teaching.

**Emotions in Multiple Languages** Jul 24 2022 Alarge-scale investigation on how multilinguals feel about their languages and use them to communicate emotion. Combining quantitative and qualitative approaches, the author looks at the factors that affect multilinguals' self-perceived competence, attitudes, communicative anxiety, language choice and code-switching.

Understanding Formulaic

<u>Language</u> Oct 23 2019 Understanding Formulaic Language: A Second Language Acquisition Perspective brings together leading scholars to provide a state-of-the-art, interdisciplinary account of the acquisition, processing, and use of formulaic language. Contributors present three distinct but complementary perspectives on the study of formulaic language – cognitive/psycholinguistic, socio-cultural/pragmatic, and pedagogical – to highlight new work as well as directions for future work. This book is an essential resource for established researchers and graduate students in second language acquisition and pedagogy, corpus and cognitive linguistics, psycholinguistics, sociolinguistics, and pragmatics.

*Language and Emotion. Volume 2* Aug 25 2022 The handbook Language and Emotion is intended to give a historical and systematic profile of the area. It will aim to connect contemporary and historical theories, approaches, and applications and to cover eastern and western perspectives of language, communication, and emotion. It will present all relevant aspects of language and emotion and thus contribute significantly to research in the field of linguistics and semiotics of emotion.

<u>The Oxford Handbook of Taboo Words and Language</u> Jan 18 2022 This volume brings together experts from a wide range of disciplines to define and describe tabooed words and language and to investigate the reasons and beliefs behind them. In general, taboo is defined as a proscription of behaviour for a specific community, time, and context. In terms of language, taboo applies to instances of language behaviour: the use of certain words in certain contexts. The existence of linguistic taboos and their management lead to the censoring of behaviour and, as a consequence, to language change and development. Chapters in this volume explore the multiple types of

tabooed language from a variety of perspectives, such as sociolinguistics, anthropology, philosophy, psychology, historical linguistics, and neurolinguistics, and with reference to fields such as law, publishing, politics, and advertising. Topics covered include impoliteness, swearing, censorship, taboo in deaf communities, translation of tabooed words, and the use of taboo in banter and comedy.

iF yearbook product 2009 Dec 05 2020 Das Jahrbuch würdigt die Gewinner des iF product design award 2009, einem der international bedeutendsten Designpreise. Es stellt alle ausgezeichneten Produkte der Kategorien Audio/Video, Telekommunikation, Computer, Licht, Möbel/ Heimtextilien, Haushalt, Freizeit/Lifestyle, Industrie/Gebäude u.v.m. vor.

**Progress in Artificial Intelligence** Nov 23 2019 This book constitutes the refereed proceedings of the 18th EPIA Conference on Artificial Intelligence, EPIA 2017, held in Porto, Portugal, in September 2017. The 69 revised full papers and 2 short papers presented were carefully reviewed and selected from a total of 177 submissions. The papers are organized in 16 tracks devoted to the following topics: agent-based modelling for criminological research (ABM4Crime), artificial intelligence in cyber-physical and distributed embedded systems (AICPDES), artificial intelligence in games (AIG), artificial intelligence in medicine (AIM), artificial intelligence in power and energy systems (AIPES), artificial intelligence in transportation systems (AITS), artificial life and evolutionary algorithms (ALEA), ambient intelligence and affective environments (AmIA), business applications of artificial intelligence (BAAI), intelligent robotics (IROBOT), knowledge discovery and business intelligence (KDBI), knowledge representation and reasoning (KRR), multi-agent systems: theory and applications (MASTA), software engineering for autonomous and intelligent systems (SE4AIS), social

simulation and modelling (SSM), and text mining and applications (TeMA).

**Recent advances in second language emotion research** Jul 12 2021 This volume contributes to the emotional boom that the field of applied linguistics is currently witnessing. It includes cutting-edge empirical studies on the interplay between language and emotion that help expand our thinking and understanding on how foreign language learners and users experience, recognise, process and express emotions in different instructional and naturalistic settings. The interdisciplinary focus, methodological innovation, and the study of underrepresented groups and target languages covered in this volume will stimulate debate and inspire both established and young researchers to consider new variables and adopt innovative paradigms in their research designs.

Learning: Design, Engagement and Definition Aug 01 2020 This book examines the topic of learning design from a human, interactive, and collaborative perspective. A variety of pedagogic and instructional modalities are thoroughly investigated as methodologies for creating functional and effective designs for students. The book is appropriate for all levels of teaching and learning, but special attention is paid to the special requirement of higher education, graduate education and post-graduate classrooms. Within the research chapters are embedded numerous examples, case studies, and implementation guides. The book is a scholarly yet practical guide to learning design and everyone from educational researchers in all areas of educational technology to instructional designers and instructional technologists will find it useful and inspiring at once.

**Multiple Access Communications** May 30 2020 This book constitutes the refereed proceedings of the 5th International Workshop on Multiple Access

Communications, MACOM 2012, held in Maynooth, Ireland, in November 2012. The 13 full papers and 5 demo and poster papers presented were carefully reviewed and selected from various submissions. The papers are organized in topical sections on network coding, handling interference and localization techniques at PHY/MAC layers, wireless access networks, and medium access control.

**Video Verification in the Fake News Era** Mar 08 2021 This book presents the latest technological advances and practical tools for discovering, verifying and visualizing social media video content, and managing related rights. The digital media revolution is bringing breaking news to online video platforms, and news organizations often rely on user-generated recordings of new and developing events shared in social media to illustrate the story. However, in video, there is also deception. In today's "fake news" era, access to increasingly sophisticated editing and content management tools and the ease with which fake information spreads in electronic networks, require the entire news and media industries to carefully verify third-party content before publishing it. As such, this book is of interest to computer scientists and researchers, news and media professionals, as well as policymakers and data-savvy media consumers.

**A User's Guide to a Computer Program for Harmonic Analysis of Data at Tidal Frequencies** Dec 17 2021
Journal of the House of Representatives of the United States Mar 28 2020 Some vols. include supplemental journals of "such proceedings of the sessions, as, during the time they were depending, were ordered to be kept secret, and respecting which the injunction of secrecy was afterwards taken off by the order of the House."

**Exploring Advances in Interdisciplinary Data Mining and Analytics: New**

**Trends** Sep 02 2020 "This book is an updated look at the state of technology in the field of data mining and analytics offering the latest technological, analytical, ethical, and commercial perspectives on topics in data mining"--Provided by publisher.
**Multilinguals' Verbalisation and Perception of Emotions** Oct 15 2021 This book investigates the interplay of language, emotion and gender in a multilingual context and provides rich insights into the complexities of bilingualism and the field of emotion research, as well as the intersection of both. Combining quantitative and qualitative analyses of data, the book examines multilinguals' verbalisation and perception of emotions in their first language and English, their second language (L2). The research looks at crosslinguistic, intercultural and gender-based differences, thereby highlighting the challenges faced by multilinguals in this context and the potential risks of miscommunication and misinterpretation. Results support the call for a change of paradigm towards a holistic approach to multilingualism and emotion research and highlight the similarities and differences in L2 users of English when expressing their emotions in the different languages. The book will appeal to anyone interested in research on emotions in the context of bi-/multilingualism or second language acquisition, as well as those teaching or learning multiple languages.
**Advances in Web-Based Learning -- ICWL 2013** Feb 07 2021 This book constitutes the refereed proceedings of the 12th International Conference on Web-Based Learning, ICWL 2013, held in Kenting, Taiwan, in October 2013. The 34 revised full papers presented were carefully reviewed and selected from about 117 submissions. The papers are organized in topical sections on interactive learning environments, design, model and framework of e-learning systems, personalized and adaptive learning, Web 2.0 and

social learning environments, intelligent tools for visual learning, semantic Web and ontologies for e-learning, and Web-based learning for languages learning.

Emotions in Second Language Teaching Sep 14 2021 This edited volume explores the multifaceted nature of teacher emotions, presenting current research from different approaches and perspectives, focused towards the second language classroom. Twenty three chapters by well-known scholars from the applied linguistics, TESOL and educational psychology fields provide the reader with a holistic picture of teacher emotions, making this collection a significant contribution to the field of second language teaching. Given the emotional nature of teaching, the book explores a number of key issues or dimensions of L2 teachers' emotions that were until now rarely considered. The contributions present the views of a select group of applied linguistic researchers and L2 teacher educators from around the world. This international perspective makes the book essential reading for both L2 teachers and teacher educators.

Microsoft Dynamics CRM 4.0 Apr 09 2021

Quality of Service in Heterogeneous Networks Feb 19 2022 This volume presents the proceedings of the 6th International ICST Conference on Heterogeneous Networking for Quality, Reliability, Security and Robustness and of the Third International ICST Workshop on Advanced Architectures and Algorithms for Internet DElivery and Applications. Both events were held in Las Palmas de Gran Canaria in November 2009. To each of these events is devoted a specific part of the volume. The first part is dedicated to the proceedings of ICST QShine 2009. The first four chapters deal with new issues concerning the quality of service in IP-based telephony and multimedia. A second set of four chapters addresses some important research

problems in mul- hop wireless networks, with a special emphasis on the problems of routing. The following three papers deal with recent advances in the field of data mana- ment and area coverage in sensor networks, while a fourth set of chapters deals with mobility and context-aware services. The fifth set of chapters contains new works in the area of Internet delivery and switching systems. The following chapters of the QShine part of the volume are devoted to papers in the areas of resource management in wireless networks, overlay, P2P and SOA arc- tectures. Some works also deal with the optimization of quality of service and energy consumption in WLAN and sensor networks and on the design of a mobility support in mesh networks.

Security and Privacy in New Computing Environments Nov 04 2020 This book constitutes the refereed proceedings of the 2nd EAI International Conference on Security and Privacy in New Computing Environments, SPNCE 2019, held in Tianjin, China, in April 2019. The 62 full papers were selected from 112 submissions and are grouped into topics on privacy and security analysis, Internet of Things and cloud computing, system building, scheme, model and application for data, mechanism and method in new computing.

**Routledge Handbook of East Asian Popular Culture** Sep 21 2019 Since the 1990s there has been a dramatic increase in cultural flows and connections between the countries in the East Asian region. Nowhere is this more apparent than when looking at popular culture where uneven but multilateral exchanges of Japanese, Korean, Taiwanese, Hong Kong and Chinese products have led to the construction of an 'East Asian Popular Culture'. This is both influenced by, and in turn influences, the national cultures, and generates transnational co-production and reinvention. As East Asian popular culture becomes a global force, it is increasingly

important for us to understand the characteristics of contemporary East Asian popular culture, and in particular its transnational nature. In this handbook, the contributors theorize East Asian experiences and reconsider Western theories on cultural globalization to provide a cutting-edge overview of this global phenomenon. The Routledge Handbook of East Asian Popular Culture will be of great interest to students and scholars of a wide range of disciplines, including: Cultural Studies, Media Studies, Communication Studies, Anthropology, Sociology and Asian Studies in general. *Multi-Carrier Systems & Solutions 2009* Oct 27 2022 The 7th International Workshop on Multi-Carrier Systems and Solutions was held in May 2009. In providing the proceedings of that conference, this book offers comprehensive, state-of-the-art articles about multi-carrier techniques and systems. **Advanced Technology in**

**Teaching - Proceedings of the 2009 3rd International Conference on Teaching and Computational Science (WTCS 2009)** Jun 23 2022 The volume includes a set of selected papers extended and revised from the International Conference on Teaching and Computational Science (WTCS 2009) held on December 19-20, 2009, Shenzhen, China. WTCS 2009 best papers Volume 1 is to provide a forum for researchers, educators, engineers, and government officials involved in the general areas of Intelligent Ubiquitous Computing and Education to disseminate their latest research results and exchange views on the future research directions of these fields. 128 high-quality papers are included in the volume. Each paper has been peer-reviewed by at least 2 program committee members and selected by the volume editor Prof.Wu. On behalf of the WTCS 2009, we would like to express our sincere appreciation to all of authors and referees for their efforts

reviewing the papers. Hoping you can find lots of profound research ideas and results on the related fields of Intelligent Ubiquitous Computing and Education.

Mobile Entity Localization and Tracking in GPS-less Environnments Jun 11 2021 This volume contains the proceedings of the Second International Workshop on Mobile Entity Localization and Tracking in GPS-less Environments (MELT 2009), held in Orlando, Florida on September 30, 2009 in conjunction with the 11th International Conference on Ubiquitous Computing (Ubicomp 2009). MELT provides a forum for the presentation of state-of-the-art technologies in mobile localization and tracking and novel applications of location-based s- vices. MELT 2009 continued the success of the ?rst workshop in the series (MELT 2008), which was held is San Francisco, California on September 19, 2008 in conjunction with Mobicom. Location-awareness is a key component for achieving context-awareness. - cent years have witnessed an increasing trend towards location-based services and applications. In most cases, however, location information is limited by the accessibility to GPS, which is unavailable for indoor or underground fac- ities and unreliable in urban environments. Much research has been done, in both the sensor network community and the ubiquitous computing community, to provide techniques for localization and tracking in GPS-less environments. Novel applications based on ad-hoc localization and real-time tracking of - bile entities are growing as a result of these technologies. MELT brings together leaders from both the academic and industrial research communities to discuss challenging and open problems, to evaluate pros and cons of various approaches, to bridge the gap between theory and applications, and to envision new research opportunities.

**Digital Language Learning and Teaching** Nov 16 2021 This carefully balanced set of studies and practitioner research projects carried out in various learning contexts around the world highlights cutting-edge research in the use of digital learning technologies in language classrooms and in online learning. Providing an overview of recent developments in the application of educational technology to language learning and teaching, it looks at the experience of researchers and practitioners in both formal and informal (self-study) learning contexts, bringing readers up to date with this rapidly changing field and the latest developments in research, theory, and practice at both classroom and education system levels. *Library and Information Science Research in Asia-Oceania: Theory and Practice* Apr 21 2022 Historically, the major Library and Information Science (LIS) research-producing centers of the world have largely been the universities and information institutions of North America, the United Kingdom, and Europe. This is changing with the growth of Asian economies, universities, and information industries. Library and Information Science Research in Asia-Oceania: Theory and Practice presents evolving and emerging research and development in the field of library and information science (LIS) in diverse countries in Asia-Oceania as the region continues to develop. This book is intended as a useful resource for LIS researchers, scholars, students, professionals, and practitioners, and is an appropriate text for courses in LIS. In addition, anyone interested in understanding the LIS field in the region will find this book a fascinating and enlightening read.
Flooding on Coral Reef-lined Coasts: Current State of Knowledge and Future Challenges Jan 06 2021
**Handbook of Research on Technology Applications for Effective Customer**

**Engagement** Jan 26 2020 In the challenging digital economy, bridging the gap between the external stakeholder and business entities through effective applications of technology carries more importance than ever before. By building a strong online presence and maintaining a long-lasting relationship with valuable customers through high-quality customer experience, companies continue to thrive during this digital age. The Handbook of Research on Technology Applications for Effective Customer Engagement is a pivotal reference source that provides vital research on the utilization of the best research practices for consumer satisfaction and loyalty. While highlighting topics such as target marketing, consumer behavior, and brand equity, this publication explores the applications of modern technology in marketing as well as recent business activities of international companies. This book is ideally designed for business professionals, practitioners, marketers, advertisers, brand managers, retailers, managers, academics, researchers, and graduate-level students.

**Critical Infrastructure Protection III** Jul 20 2019 The information infrastructure – comprising computers, embedded devices, networks and software systems – is vital to operations in every sector: inf- mation technology, telecommunications, energy, banking and ?nance, tra- portation systems, chemicals, agriculture and food, defense industrial base, public health and health care, national monuments and icons, drinking water and water treatment systems, commercial facilities, dams, emergency services, commercial nuclear reactors, materials and waste, postal and shipping, and government facilities. Global business and industry, governments, indeed - ciety itself, cannot function if major components of the critical information infrastructure are degraded, disabled or destroyed. This

book, Critical Infrastructure Protection III, is the third volume in the annualseriesproducedbyIFIP WorkingGroup11.10onCriticalInfrastructure Protection, an active international community of scientists, engineers, prac- tioners and policy makers dedicated to advancing research, development and implementation e?orts related to critical infrastructure protection. The book presents original research results and innovative applications in the area of infrastructure protection. Also, it highlights the importance of weaving s- ence, technology and policy in crafting sophisticated, yet practical, solutions that will help secure information, computer and network assets in the various critical infrastructure sectors. This volume contains seventeen edited papers from the Third Annual IFIP Working Group 11.10 International Conference on Critical Infrastructure P- tection, held at Dartmouth College, Hanover, New Hampshire, March 23–25, 2009. The papers were refereed by members of IFIP Working Group 11.10 and other internationally- recognized experts in critical infrastructure protection.

The Instructional Design Trainer's Guide Oct 03 2020 The Instructional Design Trainer's Guide provides foundational concepts and actionable strategies for training and mentoring instructional design and educational technology students to be effective across contexts. ID faculty are charged with bridging the gap between research and practice preparing graduate students for the real-world workforce. This book provides trainers and university programs with authentic learning experiences that better articulate the practices of and demands on design and technology professionals in the field. Through this enhanced perspective, learners will be better positioned to confidently embrace constraints, work among changing project expectations, interact with

multiple stakeholders, and convey to employers the skills and competencies gleaned from their formal preparation.

*Reconstructive and Reproductive Surgery in Gynecology, Second Edition* Feb 25 2020 This new edition of a groundbreaking book is now in two volumes, on 'Fundamentals, Symptoms, and Conditions' on 'Reconstructive and Fertility Preserving Surgery and Procedures. From a distinguished editorial team and internationally recognized contributors the text educates surgeons on the techniques and procedures now needed in gynecology, with a special focus on reconstructive vaginal, hysteroscopic, laparoscopic, and laparotomic surgery, including that designed to preserve or enhance fertility. The reader can now more readily understand pathogenesis, appropriate investigation, and application of both surgical and nonsurgical strategies and techniques. The two volumes contain over 20 new chapters and in the integral ebook, over 140 instructional videos; each chapter has Key Points summarized.

**Adult Minority Language Learning** Dec 25 2019 This book examines the role of affective variables in the process of learning a minority language. It presents a comprehensive account of how adult learners' attitude, motivation and identity are related to their awareness of, and commitment to, different dialects and varieties as target speech models. These issues are examined in the context of Irish, a minority language which does not have a standard spoken variety and where the vast majority of learners have no regular contact with native speakers. Using a mixed methods research approach, this study explores the relationships that exist between, on the one hand, learners' attitudes towards the three main traditional dialects of Irish and non-traditional second language varieties, and on the other, their motivation and self-concept as second language learners.

**Advances in Cryptology - ASIACRYPT 2009** Sep 26 2022 ASIACRYPT 2009,the 15th InternationalConferenceon the TheoryandApp- cationof Cryptologyand InformationSecurity washeld in Tokyo,Japan,during December 6–10, 2009. The conference was sponsored by the International - sociation for Cryptologic Research (IACR) in cooperation with the Technical Group on Information Security (ISEC) of the Institute of Electronics, Infor- tion and Communication Engineers (IEICE). ASIACRYPT 2009 was chaired by Eiji Okamoto and I had the honor of serving as the Program Chair. The conference received 300 submissions from which two papers were wi- drawn.Eachpaperwasassignedatleastthreereviewers,andpapers co-authored by ProgramCommittee members wereassigned at least ?ve reviewers.We spent eightweeksforthereviewprocess,whichconsistedoftwostages.Inthe?rstfo- week stage, each Program Committee member individually read and evaluated assigned papers (individual review phase), and in the second four-week stage, the papers werescrutinized with an extensive discussion(discussion phase). The review reports and discussion comments reached a total of 50,000 lines. Finally,theProgramCommitteedecidedtoaccepted42submissions,ofwhich two submissions were merged into one paper. As a result, 41 presentations were given at the conference. The authors of the accepted papers had four weeks to prepare ?nal versions for these proceedings. These revised papers were not s- ject to editorialreviewandthe authorsbear full responsibility fortheir contents. Unfortunately there were a number of good papers that could not be included in the program due to this year's tough competition.

**FCC Record** Mar 20 2022
**Exploring Identity Across Language and Culture** Aug 21 2019 This book explores the ways in which migrants' experience in today's

multilingual and multicultural society informs language use and processing, behavioural patterns, and perceptions of self-identity. Drawing on survey data from hundreds of Italian migrants living in English- speaking countries, in conjunction with more focused interviews, this volume unpacks reciprocal influences between linguistic, cultural, and psychological variables to shed light on how migrants emotionally engage with the local and heritage dimensions across public and private spaces. Visualising the impact of a constant shifting of linguistic and cultural practices can enhance our understanding of migration experiences, foreign language acquisition, language processing and socialisation, inclusion, integration, social dynamics, acculturation tendencies, and cross-cultural communication patterns. Overall, this book appeals to students and scholars interested in gaining nuanced insights into the linguistic, cultural, and psychological underpinnings of migration experiences in such disciplines as sociolinguistics, cultural studies, and social psychology.
