roles and responsibilities, with best industry practice required to ensure that building projects meet clients' expectations on time, cost and quality. The second edition of The Aqua Group Guide to Procurement, Tendering and Contract Administration has been edited, enlarged and updated by a high-profile author team with unparalleled experience of both private and public sectors, as well as of teaching on QS courses. It covers the entire building process from inception to final account and throughout, the emphasis is on current best practice. This edition has new material on the CDM regulations; JCT contracts; the RIBA Plan of

Work; the RICS New Rules of Measurement; BIM; and Sustainability - as well as a general update for industry changes, especially on procurement; internationalisation; and PFI. With clear and thorough explanations, you are taken through self-contained chapters covering the detail of the briefing stage, procurement methods, tendering procedures, and contract administration. The period from starting a college course to successful completion of professional examinations represents a long and steep learning curve. The range of skills and the knowledge required to perform work

efficiently and effectively might, at first, seem rather daunting. Although designed as an introductory textbook for undergraduates in construction, architecture and quantity surveying, The Aqua Group Guide offers an excellent overview of contract administration and will provide you with sufficient understanding to hold you in good stead for your early years in professional practice. BIM and Big Data for Construction Cost

Management Dec 18 2021

This book is designed to help practitioners and students in a

wide range of construction project management professions to understand what building information modelling (BIM) and big data could mean for them and how they should prepare to work successfully on BIM-compliant projects and maintain their competencies in this essential and expanding area. In this book, the state-of-the-art information technologies that support high-profile BIM implementation are introduced, and case studies show how BIM has integrated core quantity surveying and cost management responsibilities and how big data can enable informed decision-making for cost control and cost planning. The

authors' combined professional and academic experience demonstrates, with practical examples, the importance of using BIM and particularly the fusion of BIM and big data, to sharpen competitiveness in global and domestic markets. This book is a highly valuable guide for people in a wide range of construction project management and quantity surveying roles. In addition, implications for project management, facilities management, contract administration, and dispute resolution are also explored through the case studies, making this book essential reading for built environment and engineering professionals.

Decision Making In Public Sector Jan 19 2022 The success of any Organization - be it a Private or a Public Sector Enterprise (PSE) depends, to a greater degree, on the strength of its decision-making structure. A timely and well-considered decision is like the spark that sets the machinery into motion. Thus, the importance of decision making needs to be appreciated and should not be undermined at any stage. However, in the case of PSE, the problem is compounded as decision making is found wanting practically at all levels. The due adherence to the laid down procedures and proper

recording of the reason for the deviation, if any, is also cited as one of the important factors responsible for delay in PSEs. This could also be a result of the fear of vigilance or audit, inadequate data/MIS, no proper appraisal/analysis, etc. This book on 'Decision Making in Public Sector' by Shri I K Achplani can prove to be the guide that everyone is on a look out for. Shri Achplani has gathered varied experiences during his service career so far and has quite beautifully penned down his thoughts, ideas and suggestions in the form of a book. "Not only will it help the people who hold decision-making positions today, but this book is a good

a result. This book is organised and structured into seven chapters. Chapter 1 is about the estimation of construction costs. Chapter 2 gives an overview of tendering and tender documentation. Chapter 3 examines the procedure of tender examination and the approach to contract award. Chapter 4 reviews the whole process of an interim valuation from the submission of a payment application by the contractor to the issuance of an interim valuation by the quantity surveyor, identifying the key issues within the process. Chapter 5 examines the topic of construction claims. Chapter 6 addresses the cost control and monitoring

11/12

in connection with construction projects. Chapter 7 is about dispute management and three commonly used dispute resolution mechanisms, namely mediation, adjudication and arbitration are introduced. This book is essential reading for students on quantity surveying and construction management programmes, as well as the APC candidates pursuing the professional quantity surveying pathway. It is also a useful reference for practicing quantity surveyors.
