Corporate Criminal Investigations and Prosecutions Jan 27 2020 Buy a new version of this textbook and receive access to the Connected eBook on CasebookConnect, including: lifetime access to the online ebook with highlight, annotation, and search capabilities, plus an outline tool and other helpful resources. Connected eBooks provide what you need most to be successful in your law school classes. Corporate Criminal Investigations and Prosecutions provides readers a comprehensive understanding of the process behind the investigation, prosecution, and resolution of criminal charges against organizations. Over the past two decades, corporate criminal liability has developed into one of the fastest-growing and most dynamic areas of legal practice. The growth of corporate criminal enforcement has correlated with a broad shift in how the government investigates and resolves corporate criminal violations. As a result of these developments, the practice of investigating, prosecuting, and resolving corporate criminal cases has many significant differences from other areas of criminal or civil law. Notably, one of the most significant aspects that distinguishes corporate criminal practice is that much of it occurs outside of the formal judicial system; nearly all DOJ corporate criminal matters are resolved through negotiated settlements, and very few cases involve court proceedings or go to trial. As a result, many parts of this practice remain relatively unknown to students and practitioners. Until now. With the publication of this book, authors Leo Tsao, Daniel Kahn, and Eugene Soltes, whose resumes collectively reflect the highest levels of practice and expertise in this field, open a window into all aspects of corporate criminal investigations and prosecutions. Professors and students will benefit from: The authors bring a unique perspective and unparalleled qualifications to the subject of corporate criminal liability. Daniel Kahn is the former acting Deputy Assistant Attorney General of the Criminal Division and former Chief of the Fraud Section and FCPA Unit. Leo Tsao is the former Principal Deputy Chief of the Money Laundering and Asset Recovery Section and has held supervisory positions in the Bank Integrity Unit and FCPA Unit within the DOJ's Criminal Division. Eugene Soltes is a professor at Harvard Business School, and regularly teaches and advises companies on corporate integrity, organizational cultures, and compliance systems.

Comprehensive coverage: Part One addresses topics that are generally applicable to all corporate criminal cases, such as the legal principles underlying corporate criminal liability; the individual liability of corporate officers for corporate crimes; and the constitutional rights of criminal corporate defendants—to name a few. Part Two addresses specific categories of federal crimes commonly used to charge corporate defendants, such as conspiracy, the FCPA, the Bank Secrecy Act, antitrust laws, and RICO. Part Two also provides insights into criminal activity and law enforcement within the technology sector as it pertains to virtual currency (e.g., Bitcoin). Extensive online resources include discussion questions, and relevant case material for key chapters

Handbook of Social Indicators and Quality of Life Research Jun 19 2019 The aim of the Handbook of Social Indicators and Quality of Life Research is to create an overview of the field of Quality of Life (QOL) studies in the early years of the 21st century that can be updated and improved upon as the field evolves and the century unfolds. Social indicators are statistical time series "...used to monitor the social system, helping to identify changes and to guide intervention to alter the course of social change". Examples include unemployment rates, crime rates, estimates of life expectancy, health status indices, school enrollment rates, average achievement scores, election voting rates, and measures of subjective well-

being such as satisfaction with life-as-a-whole and with specific domains or aspects of life. This book provides a review of the historical development of the field including the history of QOL in medicine and mental health as well as the research related to quality-of-work-life (QWL) programs. It discusses several of QOL main concepts: happiness, positive psychology, and subjective wellbeing. Relations between spirituality and religiousness and QOL are examined as are the effects of educational attainment on QOL and marketing, and the associations with economic growth. The book goes on to investigate methodological approaches and issues that should be considered in measuring and analysing quality of life from a quantitative perspective. The final chapters are dedicated to research on elements of QOL in a broad range of countries and populations.

Handbook of Multi-Commodity Markets and Products Jan 19 2022 Handbook of Multi-Commodity Markets and Products Over recent decades, the marketplace has seen an increasing integration, not only among different types of commodity markets such as energy, agricultural, and metals, but also with financial markets. This trend raises important questions about how to identify and analyse opportunities in and manage risks of commodity products. The Handbook of Multi-Commodity Markets and Products offers traders, commodity brokers, and other professionals a practical and comprehensive manual that covers market structure and functioning, as well as the practice of trading across a wide range of commodity markets and products. Written in non-technical language, this important resource includes the information needed to begin to master the complexities of and to operate successfully in today's challenging and fluctuating commodity marketplace. Designed as a practical practitioner-orientated resource, the book includes a detailed overview of key markets – oil, coal, electricity, emissions, weather, industrial metals, freight, agricultural and foreign exchange – and contains a set of tools for analysing, pricing and managing risk for the individual markets. Market features and the main functioning rules of the markets in question are pres- ented, along with the structure of basic financial products and standardised deals. A range of vital topics such as stochastic and econometric modelling, market structure analysis, contract engineering, as well as risk assessment and management are presented and discussed in detail with illustrative examples to commodity markets. The authors showcase how to structure and manage both simple and more complex multi-commodity deals. Addressing the issues of profit-making and risk management, the book reveals how to exploit pay-off profiles and trading strategies on a diversified set of commodity prices. In addition, the book explores how to price energy products and other commodities belonging to markets segmented across specific structural features. The Handbook of Multi-Commodity Markets and Products includes a wealth of proven methods and useful models that can be selected and developed in order to make appropriate estimations of the future evolution of prices and appropriate valuations of products. The authors additionally explore market risk issues and what measures of risk

should be adopted for the purpose of accurately assessing exposure from multi-commodity portfolios. This vital resource offers the models, tools, strategies and general information commodity brokers and other professionals need to succeed in today's highly competitive marketplace.

Dogen's Manuals of Zen Meditation Apr 29 2020 Zen Buddhism is perhaps best known for its emphasis on meditation, and probably no figure in the history of Zen is more closely associated with meditation practice than the thirteenth-century Japanese master Dogen, founder of the Soto school. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization. The Soto version of Zen meditation is known as "just sitting," a practice in which, through the cultivation of the subtle state of "nonthinking," the meditator is said to be brought into perfect accord with the higher consciousness of the "Buddha mind" inherent in all beings. This study examines the historical and religious character of the practice as it is described in Dogen's own meditation texts, introducing new materials and original perspectives on one of the most influential spiritual traditions of East Asian civilization.
