Discourse on Free Will Aug 14 2021 Comprising Erasmus's The Free Will and Luther's response The Bondage of the Will, Discourse on Free Will is a landmark text in the history of theology and philosophy. As Erasmus's humanist vision is contrasted with Luther's notion of freedom dictated by the grace of God we can see the beginning of the debates that, to this day, separate the secular and the religious.

Peter Oct 04 2020 This book critically examines all the early and important Petrine pseudepigrapha to identify a distinctive Petrine theology which, it is believed, was later swamped by the tide of western orthodoxy. Despite the diversity of the books and tractates, ranging from Jewish-Christian writings to avowedly Gnostic works, a remarkably consistent Petrine tradition does emerge; and Peter is shown essentially to be neither the impetuous, undiscerning, and even vacillating figure portrayed in the Gospels and Acts, nor the magisterial and pontifical figure of later Church tradition, but a visionary who was concerned above all to hold together both the moral and cognitive aspects of the Faith.

Ecclesiology and the Scriptural Narrative of 1 Peter May 23 2022 The relationship between the Church and the Scriptures of Israel is fraught with complexities, particularly about how the first Christians read Scripture alongside the Gospel of Christ. Patrick T. Egan examines the text of 1 Peter in the light of its numerous quotations of Scripture and demonstrates how the epistle sets forth a scriptural narrative that explains the nature and purpose of the Church. Egan argues that 1 Peter sets forth an ecclesiology based in a participatory Christology, in which the Church endures suffering in imitation of Jesus's role as the suffering servant. The epistle admonishes the Church to a high moral standard in response to Christ's atoning work while also encouraging the Church to place hope in God's final vindication of his people. Addressing the churches of Asia Minor, 1 Peter applies the Scriptural narrative to the Church in unexpected ways.

Good Works in 1 Peter Jul 25 2022 Drawing on recent insights from postcolonial theory and social psychology, Travis B. Williams seeks to diagnose the social strategy of good works in 1 Peter by examining how the persistent admonition to "do good" is intended to be an appropriate response to social conflict. Challenging the modern consensus, which interprets the epistle's good works language as an attempt to accommodate Greco-Roman society and thereby to lessen social hostility, the author demonstrates that the exhortation to "do good" envisages a pattern of conduct which stands opposed to popular values. The Petrine author appropriates terminology that was commonly associated with wealth and social privilege and reinscribes it with a new meaning in order to provide his marginalized readers with an alternative vision of reality, one in which the honor and approval so valued in society is finally available to them. The good works theme thus articulates a competing discourse which challenges dominant social structures and the hegemonic ideology which underlies them.

The SAGE Encyclopedia of Contemporary Early Childhood Education Jul 01 2020 The general public often views early childhood education as either simply “babysitting” or as preparation for later learning. Of course, both viewpoints are simplistic. Deep understanding of child development, best educational practices based on development, emergent curriculum, cultural competence and applications of family systems are necessary for high-quality early education. Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age. The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research, accurate practical applications of research, historical foundations and key facts from the field of contemporary early childhood education. Through approximately 425 entries, this work includes all areas of child development – physical, cognitive, language, social, emotional, aesthetic – as well as comprehensive review of best educational practices with young children, effective preparation for early childhood professionals and policy making practices, and addresses such questions as: · How is the field of early childhood education defined? · What are the roots of this field of study? · How is the history of early childhood education similar to yet different from the study of public education? · What are the major influences on understandings of best practices in early childhood education?
