Right From Wrong Sep 01 2020 Does your child have a conscience? Is he remorseful when caught in a lie? Very high on any wise list of dreams for our children is the hope that they become people of integrity. But integrity is not simply something that happens as a result of unconditional love, healthy genes, or good luck; it emerges, if it does, because parents make it a priority to exercise influence in this arena. Combining stories of children experiencing the day-to-day struggles of growing up with compassionate, in-depth analysis and pragmatic counsel, Right From Wrong makes nurturing the qualities of integrity tangible to parents and to the others who might be actively involved in guiding a child's moral life. Through the authors' wise and discerning eyes we witness children as they experience loss or sadness, react to sibling rivalries, schoolyard violence, and academic pressures, or even while they interact at the family dinner table. The ways in which parents use listening, praise, discipline, honesty, and consequences to react to these situations reinforces a child's sense of right and wrong; from these choices readers will learn valuable lessons about a parent's power to nurture character and morality in young children.

Mothering Our Boys Jan 17 2022 "Maggie is earthy and real, full of love and knowledge, especially on raising sons." - Steve Biddulph "Maggie's perspective on raising boys is spot on. She writes with humor and depth, providing insight and strategies for many of the most important issues facing moms. There is a lovely ease to her writing and a powerful honesty. I hope every mother of a son (and everyone else!) will read this book. The future of the world, to a great extent, depends on how we raise our boys." - Michael Gurian, New York Times Bestselling Author of The Wonder of Boys and Saving Our Sons If we can see the world through boys' eyes a little better, we will make different choices in the way we mother them... and we will find them less confusing, and love them more deeply. Mothers of sons are worried about raising their boys in a world where negative images of masculinity are front and centre of our media, almost every day. Not only that, but statistically our boys are still struggling in many ways. Even though we live in a time where we recognise that nothing in gender is fixed, it remains a fact that the influence of a mother on her son is massive. A mother of four sons herself, Maggie Dent draws on her personal experience - and over four decades work as a teacher, counsellor and now author and speaker - to help build understanding, empathy and compassion for our boys. Maggie shares her five key secrets that every mum needs to know and uses the voices of men she has worked with and surveyed to reveal what really matters in a boy's relationship with his mother and other mother figures. Maggie is one of Australia's most popular parenting authors and educators, and her seminars about boys have sold out all across Australia and in the UK. She is finally sharing her insights, her reflections, and (as always) her humour around mothering boys to help you be the mum your son needs you to be.

Boys, Masculinities and Reading Jul 19 2019 Boys, Masculinities and Reading explores elementary students' interpretations of their experiences of reading and the contextual influences that impact those experiences. While research continues to highlight the apparent systematic underperformance of boys in comparison to girls on national and international reading benchmarks, this text moves beyond broad generalizations to consider complexities inherent in notions of masculinity and associated tensions. Applying a socio-cultural perspective, Scholes highlights the voices of boys and girls by focusing on their reading experiences. Examining the perceived, generalized "crisis" of boys' underperformance in reading and literacy, Scholes identifies the factors that shape perceptions of masculinity among different groups of boys across the globe.

Shepherding a Child's Heart Jul 23 2022 Shepherding a Child's Heart is about how to speak to the heart of your child. The things your child does and says flow from the heart. The Invisible Presence Feb 24 2020 Whether he's conscious of it or not, a man's mother is the model for just about every relationship with a woman he has for the rest of his life. Sometimes it's obvious (just ask his wife or girlfriend), sometimes it's more subtle, but when you see it, it becomes crystal clear. For fifteen years, this book has helped men understand their mothers' pervasive influence over the way they relate to women—both the positive and negative aspects of it. But more than that, it has helped thousands of men break free of old relationship patterns. Gurian gives men a wealth of practical exercises and meditations they can use to recognize their mothers' influence in relationships, and to establish a healthy and rewarding new basis for relationships that will benefit themselves and the women in their lives as well. This new edition of the book formerly titled *Mothers, Sons, and Lovers* includes a new preface and study questions by the author.

Teacher Professional Development in Changing Conditions Nov 03 2020 This book presents some highlights from the deliberations of the 2003 conference of the International Study Association on Teachers and Teaching (ISATT). Part 1 presents the five keynote addresses of the conference, while Parts 2 through 4 present selected papers related to each of three sub-themes: knowledge construction and learning to teach, perspectives on teachers' personal and professional lives, and teachers' workplace as context for learning. The chapters in this book provide an array of approaches to understanding the process of teacher learning within the current context of the changing workplace environment. They also provide an important international perspective on the complex issues revolving around the international educational reform movement. Basically, they show how teachers' workplace (inside and outside schools) are more than ever subject to continuous change and that, subsequently, standards for teaching must be flexible to these changing conditions. This asks for a redefinition of teacher professionalism in which the role of context in teacher learning is emphasized as well as the improvement of the quality of teacher

thinking and learning. Related to the ever-changing context of teaching, a dynamic approach to teaching and teacher learning is required, in which identity development is crucial. Researchers have an important role to play in revealing and explaining how teachers can build their professional identity, through self-awareness and reflection, in the ever-changing educational contexts throughout the world.

Legalizing Misandry Oct 02 2020 Paul Nathanson and Katherine Young believe that this reveals a shift in the United States and Canada to a worldview based on ideological feminism, which presents all issues from the point of view of women and, in the process, explicitly or implicitly attacks men as a class. They argue that ideological feminism is silently reshaping law, public policy, education, and journalism.

It was, quite simply, the most important relationship in John's life. With riveting insight, Andersen reveals how mother and son influenced, challenged, and supported each other through good times and bad, unveiling startling new details about a family we thought we already knew: John's reaction to his mother's bout with suicidal depression and growing dependence on prescription drugs; the surreal and ultimately catastrophic impact of the Onassis years; the premonitions that terrified Jackie about John's fate; Jackie's success at keeping John away from his hellraising cousins, and his complicated relationship with the rest of the clan; the power she wielded over his affairs with Madonna, Sarah Jessica Parker, Daryl Hannah, and others; how John privately handled the scandalous revelations about his parents' marriage; the secrets about John's own turbulent marriage and his senseless death. Bittersweet, provocative, thoughtful and inspiring, this is the often heartbreaking tale of two lives tested by history and tragedy.--From publisher description.

***Brothers and Sisters in Adoption* Apr 08 2021** What about the kids already there? How do they do when a child with a challenging past joins a family by adoption? When experienced parents decide to adopt an older child or a sibling group, they jump through all kinds of bureaucratic hoops â?? background checks, interviews, group meetings, reading assignments, classes, etc. But most often the typically developing children these adults are already parenting (whether through birth or adoption) are left out of the process, informed that a new kid is coming, and simply expected to â??adjustâ?? to the addition of another sibling. The addition of a child with a history of neglect or trauma cannot be a seamless transition. The expectations of everyone involved â?? parents, new

siblings, and, yes, professionals facilitating the adoption must be realistic, taking into account that the new child will need special attention that may take away time and attention from the already resident kids, that family life is likely to be turned topsy turvy until appropriate counseling and support are in place, that relationships will change. Therapist Arleta James is certainly not the first person to recognize this, but she is the first to do something about it. Brothers and Sisters in Adoption offers insights and examples and sturdy, practical, proven tools for helping newly configured families prepare, accept, react, and mobilize to become a new and different family meeting the practical, physical and emotional needs of all its members. These well prepared and supported families are the ones who thrive!

The Shaping Shaikh Sep 20 2019 Islam is more than a system of rigid doctrines and normative principles. It is a diverse mosaic of subjective, often contradictory interpretations and discrepant applications that prohibit a narrow, one-dimensional approach. This book argues that to uncover this complex reality and achieve a more accurate understanding of Islam as a lived religion, it is imperative to consider Islam from the point of view of human beings who practice their faith. Consequently, this book provides an important contribution through a detailed ethnographic study of two contemporary Sufi communities. Although both groups shared much in common, there was a fundamental, almost perplexing range of theological convictions and ritual implementations. This book explores the mechanism that accounts for such diversity, arguing for a direct correlation between Sufi multiformity and the agency of the spiritual leader, the Shaikh. Empirical research regarding the authority by which Shaikhs subjectively generate legitimate adaptations that shape the contours of religious belief are lacking. This study is significant, because it focuses on how leadership operates in Sufism, highlighting the primacy of the Shaikh in the selection and appropriation of inherited norms.

Crossing into Manhood: A Men's Studies Curriculum Nov 22 2019

Boys and Girls Learn Differently! May 09 2021 At last, we have the scientific evidence that documents the many biological gender differences that influence learning. For instance, girls talk sooner, develop better vocabularies, read better, and have better fine motor skills. Boys, on the other hand, have better auditory memory, are better at three-dimensional reasoning, are more prone to explore, and achieve greater abstract design ability after puberty. In this profoundly significant book, author Michael Gurian synthesizes the current knowledge and clearly demonstrates how this distinction in hard-wiring and socialized gender differences affects how boys and girls learn. Gurian presents a new way to educate our children based on brain science, neurological development, and chemical and hormonal disparities. The innovations presented in this book were applied in the classroom and proven successful, with dramatic improvements in test scores, during a two-year study that Gurian and his colleagues conducted in six Missouri school districts.

Flashpoint Jun 10 2021 What you have here is an experiment. A curious collection of short stories all under 1,000 words - flash fiction. In many cases these are potential novels, novellas and longer works from the author's notebooks and that have been shaped into complete, albeit short, works in this collection. Some of the stories were created just for this collection and many of them dealing with the end of the world, horror, mysteries and more. According to author Bryan Alaspa, this is a collection like you might find in a musical box set where you find a special CD containing B-sides, alternate takes and outtakes. In this case, the author says this is a true peek into his creative process and the works that, many times, become his novels.

Chronic Youth Mar 27 2020 The teenager has often appeared in culture as an anxious figure, the repository for American dreams and worst nightmares, at once on the brink of success and imminent failure. Spotlighting the "troubled teen" as a site of pop cultural, medical, and governmental intervention, Chronic Youth traces the teenager as a figure through which broad threats to the normative order have been negotiated and contained. Examining television, popular novels, science journalism, new media, and public policy, Julie Passanante Elman shows how the teenager became a cultural touchstone for shifting notions of able-bodiedness, heteronormativity, and neoliberalism in the late twentieth century. By the late 1970s, media industries as well as policymakers began developing new problem-driven 'edutainment' prominently featuring narratives of disability—from the immunocompromised *The Boy in the Plastic Bubble* to ABC's *After School Specials* and teen sick-lit. Although this conjoining of disability and adolescence began as a storytelling convention, disability became much more than a metaphor as the process of medicalizing adolescence intensified by the 1990s, with parenting books containing neuroscientific warnings about the incomplete and volatile "teen brain." Undertaking a cultural history of youth that combines disability, queer, feminist, and comparative media studies, Elman offers a provocative new account of how American cultural producers, policymakers, and medical professionals have mobilized discourses of disability to cast adolescence as a treatable "condition." By tracing the teen's uneven passage from postwar rebel to 21st century patient, Chronic Youth shows how teenagers became a lynchpin for a culture of perpetual rehabilitation and neoliberal governmentality.

Becoming Adult Learners Jan 25 2020 This book offers a new and promising way to support adults in Adult Basic Education (ABE) and English for speakers of other languages (ESOL) programs specifically, and learners in adult education, in general. Applying renowned Harvard University psychologist Robert Kegan's constructive-development theory, Drago-Severson depicts an in-depth investigation into how and why adults develop "ways of knowing" to better prepare them for their work in the 21st century. This book provides practical suggestions for applying Kegan's theory in adult education classrooms to enable teachers, curriculum developers, program designers, and policymakers to better respond to adult learners' strengths and learning needs.
