The Gun and the Olive Branch Dec 09 2020 The classic and controversial account of the origins of the Middle East conflict returns to print More than a decade before Israel's New Historians revolutionized the study of Israeli history, English journalist David Hirst wrote *The Gun and the Olive Branch*, a classic, myth-breaking general history of the Israeli-Palestinian conflict. Hirst, former Middle East correspondent of the Guardian, traces the origins of the terrible conflict back to the 1880s to show how Arab violence, although often cruel and fanatical, is a response to the challenge of repeated aggression. *The Gun and the Olive Branch* is an absorbing, potentially controversial, history of the Middle Eastern conflict that is indispensable to anyone with an interest in world politics and by partisans of both sides

Biology of Root Formation and Development Feb 20 2022 This book contains the majority of the presentations of the Second International Symposium on the Biology of Root Formation and Development that was held in Jerusalem, Israel, June 23--28, 1996. Following the First Symposium on the Biology of Adventitious Root Formation, held in Dallas, USA, 1993, we perceived the need to include all kinds of roots, not only the shoot-borne ones. The endogenous signals that control root formation, and the subsequent growth and development processes, are very much alike, regardless of the sites and sources of origin of the roots. Therefore, we included in the Second Symposium contributions on both shoot-borne (i.e., adventitious) roots and root-borne (i.e., lateral) roots. Plant roots have remained an exciting and an intriguing field of science. During the years that followed the first symposium, an exceptional proliferation of interest in root biology has developed, associated with the intensive research activity in this field and the contemporary developments in the understanding of root function and development. New methods have been applied, and old ideas and interpretations were reexamined. Altogether, it became necessary to update our viewpoints and to expand them.
