Generalized Additive Models Mar 24 2022 This book describes an array of power tools for data analysis that are based on nonparametric regression and smoothing techniques. These methods relax the linear assumption of many standard models and allow analysts to uncover structure in the data that might otherwise have been missed. While McCullagh and Nelder's *Generalized Linear Models* shows how to extend the usual linear methodology to cover analysis of a range of data types, *Generalized Additive Models* enhances this methodology even further by

incorporating the flexibility of nonparametric regression. Clear prose, exercises in each chapter, and case studies enhance this popular text.

Data Recovery Tips & Solutions: Windows, Linux, and BSD Feb 29 2020 This comprehensive manual covers three areas in which system administrators must be proficient to successfully recover data: the structure and operating principles of the most popular file systems, automatic data recovery techniques, and manual recovery techniques used in cases of total data destruction. Data recovery from hard drives and optical storage in Windows, BSD, and Linux file systems is described, as are automatic recovery utilities, manual and automatic recovery of deleted files on ext2/ext3 partitions and NTFS partitions, formatted NTFS partitions and deleted UFS/FFS files, RAID data recovery, media restoration with physical damage, and data loss prevention.

Principles of Pharmacology Jun 22 2019 This workbook contains over 100 patient cases and over 400 multiple-choice questions and answers to reinforce the material in Golan's Principles of Pharmacology, Second Edition. All of the cases have been successfully used in teaching pharmacology at Harvard Medical School. Each chapter contains the case from the corresponding chapter in the textbook, plus one or two additional cases. Each case includes multiple-choice questions that require the student to think through the case. Answers and

explanations appear at the end of the book. The fully searchable online text is available on thePoint, with a link to the Golan textbook Website.

Female Prisoners, AIDS, and Peer Programs Dec 21 2021 ? ? This book highlights a neglected area in the field of rehabilitation of female offenders with AIDS. It provides data to show how women, working as HIV peer educators in prison, utilize their peer experiences as a transition point for rehabilitation both inside and outside of the penitentiary. HIV and prison are inextricably linked and education has proved to be the one constant that mitigates the spread of both HIV and crime. Research on female inmates in general is not frequent and this book presents unique qualitative data that includes rich accounts from the women themselves. It illustrates the benefits derived by female inmates who work in an HIV prison-based peer program, while adding to the criminology literature on female patterns of criminality and rehabilitation. It provides a greater understanding of how prison programs affect the processes of criminal desistance and behavioral changes for female inmates. Women involved in such programming are able to change the criminal trajectory of their life direction, contributing to reduced levels of recidivism and institutional disciplinary infractions. The implications for these programs is relevant within the broader perspective of women, HIV and incarceration. ?

Scheduling Computer and Manufacturing Processes Oct 26 2019 This book is a continuation of Scheduling in Computer and Manufacturing Systems 1, two editions of which have received kind acceptance of a wide readership. As the previous position, it is the result of a collaborative German-Polish project which has been partially supported by Committee for Scientific Research 2 and DFG. We appreciate this help. We decided to treat this work as a new book rather than the third edition of the previous one due to two important reasons. First of all, the contents has been changed significantly. This concerns not only corrections we have introduced following the suggestions made by many readers (we are very grateful to all of them!) and taking into account our own experience, but first of all this means that important new material has been added. In particular, in the introductory part the ideas of new local search heuristics, i. e. generally applicable global optimization strategies with a simple capability of learning (ejection chains, genetic algorithms) have been presented. In the framework of parallel processor scheduling, topics of imprecise computations and lot size scheduling have been studied. Further on flow shop and job shop scheduling problems have been studied much more extensively, both from the viewpoint of exact algorithms as well as heuristics.

Cognitive Psychology Oct 07 2020 This fifth edition of the best-selling international cognitive psychology textbook has been substantially updated and restructured to reflect new developments in cognitive psychology, and made more student-friendly. Established approaches covered in depth include: Experimental cognitive psychology Cognitive science with its focus on modelling Cognitive neuropsychology with its focus on cognition following brain damage. Extensive new material in this edition includes: Cognitive neuroscience approaches such as brain scanning and imaging studies which illustrate the principles of brain function New material on consciousness. Throughout, the new material is fully integrated with more traditional approaches to create a comprehensive, coherent and totally current overview of perception, attention,

memory, concepts, language, problem solving, judgement and reasoning. A two-colour design, plus a rich array of supplementary multimedia materials, make this edition more accessible and entertaining for students. The multimedia materials include: A PowerPoint lecture course and MCQ Test Bank free to qualifying adopters A unique web-based Student Learning Program. This is an interactive revision program incorporating a rich array of multimedia resources including interactive exercises and demonstrations, and active reference links to journal articles. This is offered on a subscription basis to departments adopting the text. A free demonstration of a sample chapter is available to potential subscribers at <http://www.psympress.com/ek5/> .
