China and the Global Business Revolution Apr 12 2021 China has used industrial policies to try to build large corporations that can challenge those based in more advanced countries. By the late 1990s the operational mechanism of China's large firms had seen large advances. Simultaneously, a revolution has taken place in global business systems, and China's large firms are even further behind the global leaders than when they began their reforms. The WTO will require China to operate rapidly on the 'global playing field' in competition with the world's leading corporations, and this increased gap presents a deep challenge for China's business and political leaders. Peter Nolan presents here the first in-depth case studies of China's large corporations under economic reform, combined with systematic benchmarking of these firms against the world's leading corporations. The book is an unrivalled resource of information on Chinese businesses, and also leads the reader to consider the impact of China's response to its current challenges not only on China itself, but on the wider global economy.

Trucker1954 Jul 16 2021 This is the story of my first year as a long-haul truck driver. I started driving after I retired from a long career in the aerospace industry. For eight weekends before I retired I attended the Roadmaster truck driving school and then passed the tests at the DMV to obtain my Commercial Drivers License (CDL). This eBook contains: - stories, photos, and music videos from my year Over The Road - lots of technical info and several training videos on the nuts and bolts of truck driving - tips and advice from lessons learned on the road - my truck driving cartoon series called "The Rusty Lugnut Funny Pages". To give you a taste of it, here is an excerpt from one of my stories: "My instructor was still clinging to the side of the truck when this all started, so now he was along for the ride. His right arm was holding onto the door frame and his left arm was waving in the air like a cowboy on a bucking bronco. The other students were rolling with laughter. Finally he yelled "Push in the clutch!" I did that and the truck stopped bouncing and came to a stop. When the dust cleared I gave him an embarrassed look and said "Sorry 'bout that." He rolled his eyes and climbed down and said "Next".
